

DACnet™, the electronic
claims network for Denturists

DACnet™ Communiqué: Co-Ordination of Benefits, February 14, 2020

The Denturist Association of Canada (The DAC) has been providing DACnet™ electronic claims network services for Denturists since early 2007.

We would like to remind providers that through DACnet™ with your patient record keeping software it is possible to electronically coordinate benefits for claims if a patient has primary and secondary coverage, meaning there are two different claim processors involved. It is important to us that all users of DACnet™ know that this feature is available because it is truly a service patients' value for quicker adjudication and reimbursement of their primary and secondary claim submissions. This also benefits providers who accept assignment of benefits - together with the cost savings of paper claims to the secondary coverage, regardless of whether the provider accepts-assignment.

The insurance carriers that accept DACnet™ claims and support the co-ordination of benefits transaction are as follows:

Alberta Blue Cross (including Alberta School Employee Benefit Plan)
Alberta Dental Service Corporation (Alberta Employment, Immigration, and Industry Program)
Autoben
Canadian Life Assurance Company (formerly known as Great West Life, London Life and Canada Life)
Green Shield Canada
Groupe Financier AGA Inc.
La Capitale
Manitoba Blue Cross
NexgenRx
Pacific Blue Cross
Quickcard
Sun Life Financial
The Co-Operators
UV Assurance

It is important that your patient record keeping software is configured properly to ensure that the 07 claim transaction is enabled, so that you are able to utilize the co-ordination of benefits function for the above carriers (see link http://dacnet.ca/pdf/SupportedTransactions_DACnet_E_Jan21_2020.pdf). If you are unsure how to enable this 07 claim transaction, please contact your software vendor for help to configure your patient record keeping software, so that you are able to utilize this function.

Our office remains available to answer any questions you may have regarding the above and to provide additional information/support to you or your software vendor in the configuration processes.
